

In the Abstract

Amend the Abstract of the Disclosure as follows:

~~ABSTRACT~~
ABSTRACT OF THE DISCLOSURE

~~A METHOD AND AN INSTALLATION FOR VERIFYING THE IDENTITY OF THE
SENDER OF A TELEPHONE CALL OVER AN INTERNET PROTOCOL NETWORK, AND
A TELEPHONE TERMINAL THEREFOR~~

To verify the identity of the sender of a telephone call over an Internet ~~Protocol~~ network, there is inserted into a field of a call set-up request frame an encrypted control code containing parameters relating to the identity of a telecommunications terminal from which the telephone call is sent[[: a]]. A remote call management server decrypts the control code {lacuna}. At least one parameter extracted from the decrypted control code is compared with corresponding information stored in a database hosted in the server, and the call is set up as a function of the result of the comparison.
